

GENE WOWK

Architectural Design | Build Professional

PROFESSIONAL SUMMARY

Architectural design and production leader with extensive experience coordinating multidisciplinary teams, guiding design standards, and supporting city-facing workflows across residential, mixed-use, and hospitality projects. I bring a systems-driven approach to aligning design intent with regulatory requirements, BIM-supported documentation, and predictable permitting outcomes.

My work lives at the intersection of imagination and precision, where design vision, technical clarity, and stakeholder priorities converge to create environments that are intentional, efficient, and community-aligned.

CliftonStrengths: Strategic | Ideation | Positivity | Adaptability | Arranger

CORE SKILLS

- Urban & Community Design Coordination - Design Standards & QA/QC
- Cross-Department Collaboration (Planning, Engineering, Building Safety)
- BIM-Supported Design Review - Construction Documentation
- Permitting & Regulatory Workflow Support
- Stakeholder & Public-Facing Communication
- Alternative Building Systems - Modular & Parametric Design
- Process Optimization - Consultant & Contractor Coordination

EDUCATION

University of Arizona | ITT Technical Institute – Associate of Applied Science – 1994

TECHNICAL SKILLS

Revit | BIM 360 | AutoCAD | Enscape | Adobe Creative Suite | MS Office BIM Modeling | Parametric Family Creation | Modular Systems | Design Automation Construction Documentation | QA/QC | Alternative Building Systems & Materials

EXPERIENCE

Area Production Manager | Pulte Group

Scottsdale, AZ | 2025-2026

- Directed multi-community residential projects, optimizing design documentation and construction workflows for scalable, city-aligned development.
- Coordinated design standards across teams to support predictable permitting and review cycles.
- Strengthened cross-disciplinary communication between design, engineering, and construction groups.

Project Manager | The DAVIS Experience

Phoenix, AZ | 2023-2025

- Delivered BIM-coordinated design and construction documents for hospitality and mixed-use projects.
- Maintained design integrity while managing consultant data and aligning submittals with municipal expectations.

Project Architect | Form Third Design/Build

Phoenix, AZ | 2022-2023

- Managed design-build projects from concept through construction, ensuring compliance with permitting, inspection, and municipal coordination requirements.
- Led direct interaction with owners to align design intent, budget, and construction feasibility with city requirements and project constraints.
- Oversaw construction documentation and field integration to support construction and city review processes.

Project Architect | Nelson Partners

Scottsdale, AZ | 2019-2022

- Produced BIM-based design and construction documents for mixed-use developments.
- Coordinated consultant teams to meet city standards for safety, accessibility, and urban integration.

Architectural Designer | Perlman Architects

Las Vegas, NV | 2018-2019

- Developed design concepts and documentation for multifamily and hospitality projects.

Architectural Manager / Designer | Legacy Design/Build Remodeling

Scottsdale, AZ | 2016-2018

- Led client engagement, design development, permitting, and construction administration for residential remodels and additions.
- Managed direct coordination with city departments to secure approvals and maintain compliance.

ADDITIONAL EXPERIENCE

- Principal Architectural Designer | Wowk Design | Oro Valley, AZ | 2008-2016
- Division Production Manager | Pulte Homes | Tucson, AZ | 2006-2008
- Principal Architectural Designer | Wowk Design | Oro Valley, AZ | 2000-2006
- Job Captain / CAD Manager | Lessard Architectural Group | Tysons Corner, VA | 1998-2000
- Project Manager | Residential Design Group | Woodbridge, VA | 1997-1998
- Job Captain | Pulte Homes | Tucson, AZ / Fairfax, VA | 1994-1997

PROFESSIONAL HIGHLIGHTS

Through decades in architecture, design-build, and production leadership, my work has been shaped by the quiet interplay between vision and structure. A place where ideas gather weight, gain clarity, and become environments people inhabit and remember. I've collaborated with owners, contractors, consultants, and makers to guide projects from early concept through construction, ensuring that every decision supports both design integrity and the lived experience.

I bring a deep fluency in BIM-driven workflows, using modeling, data, and digital precision to create systems that make the journey from concept to construction feel fluid, predictable, and intentional. My practice is grounded in thoughtful material exploration, alternative building systems, and a belief that the character of a space is shaped as much by its technical underpinnings as by its aesthetic aspirations.

At the heart of my work is a commitment to orchestrating alignment between stakeholders, standards, and the technical realities that shape the built environment. I thrive where design, technology, and construction meet, translating vision into clarity and complexity into logic.

DESIGN PHILOSOPHY

I believe meaningful environments emerge from the strategy between imagination and discipline. Design is not simply the act of creating form, it is the careful negotiation between desire, constraint, and the systems that allow ideas to become real. The strongest spaces feel inevitable, as though every detail was considered, every material chosen with intention, and every line drawn in service of how people will experience the place.

To design well is to listen to the site, to the client, to the community, and to the subtle cues that reveal what a project wants to become. My work seeks to honor that dialogue, shaping environments that are efficient, expressive, and grounded in purpose.

COMMUNITY ENGAGEMENT

My commitment to design extends beyond professional practice and into the communities I serve. I've offered formal and informal guidance to homeowners navigating remodels, helping them understand not just drawings and details, but the possibilities, constraints, and quiet decisions that shape the character of a home. I've participated in neighborhood conversations around growth, identity, and responsible development, listening closely to the stories and concerns that define a place.

For several years, I served on a local **Development Review Board**, contributing to the civic dialogue that determines how projects evolve within the fabric of the community. In that role, I evaluated proposals not only for compliance, but for clarity of intent, contextual sensitivity, and the ways in which design choices influence the lived experience of residents. It strengthened my belief that thoughtful development is a shared responsibility, a collaboration between designers, builders, city staff, and the people who call a place home.
